

JOSHUA CARANZO

SOFTWARE DEVELOPER

Cebu, Philippines | [_jhc-profile.vercel.com](https://jhc-profile.vercel.com) | 09193373603 | <https://github.com/Joshua-Caranzo>

ABOUT ME

Software Developer experienced in full-stack, backend, mobile, and enterprise application development. I enjoy solving complex problems, building practical software, and working with APIs, databases, and modern technologies.

PROFESSIONAL EXPERIENCE

Research & Development Engineer — Advanced World Solutions September 2025 - Present

- Maintain and overhaul multiple Japanese hospital desktop applications.
- Develop new features and improve existing functionality across backend systems and databases.
- Modernize technologies and support newer application versions.

Full-Stack Mobile Developer — Exacon Landworth Corporation January 2025 – May 2025

- First and sole developer of a mobile inventory management and POS application for Balay Panday.
- Developed the application across mobile frontend, backend services, APIs, and database integration.
- Implemented inventory tracking, product management, sales processing, and related business workflows.

Freelance Full-Stack Web Developer November 2023 – January 2025

- Developed web-based systems for school and electrical engineering clients.
- Built features for registrar, enrollment, payroll, inventory, task management, job tracking, and daily operations.

EDUCATION

Bachelor of Science in Information Technology June 2021- June 2025

University of Cebu

- Cum Laude
